ABSTRACT

The status of the National Health Service Corps Scholarship Program is examined in this third annual report with cumulative data from inception of the program. The scholarship award includes the payment of a monthly stipend, tuition and fees, and other educational expenses in a federal program of service-conditional awards for students of allopathic and osteopathic medicine, dentistry, and other health professions. In return for each year of award, scholarship recipients must agree to serve one year providing clinical health care services in designated health manpower shortage areas of the United States. Appropriations for the 1979-80 academic year (fiscal year 1979) were $75 million, a $15 million increase over the previous year, with 7,399 applicants. Appropriations for the seven award cycles from the 1973-74 academic year totaled $245.5 million. Awards for the 1979-80 academic year totaled 6,408, with 2,379 awards made to new recipients and 4,029 to former recipients. For the seven award cycles of the program, 22,670 awards have been made to 11,446 students. By the end of fiscal year 1979, 238 scholarship recipients had fulfilled their service obligation; 189 were physicians and 49 were dentists. During the 1979 fiscal year, 605 scholarship participants entered obligated service. Scholarship participants (8,910) still in training are expected to enter service obligations during the fiscal years 1980 through 1986. The service obligations of all recipients since the program began totals over 22,000 person-years. (CC)

# EXECUTIVE SUMMARY

Section 751(i) of the Public Health Service (PHS) Act, as amended, requires the Secretary of Health, Education, and Welfare to report to the Congress on March 1 of each year on the status of the National Health Service Corps (NHSC) Scholarship Program. This, the Third Annual Report, describes the activities of the Program for the academic year 1979-80, with cumulative data from inception of the Program in the 1973-74 academic year.

The NHSC Scholarship Program is a competitive Federal program of service-conditional awards for students of allopathic and osteopathic medicine, dentistry, and other health professions. The Scholarship award includes the payment of a monthly stipend, tuition and fees, and an amount to cover other educational expenses. In return for each year of award, Scholarship recipients must agree to serve 1 year providing clinical health care services in designated health manpower shortage areas of the United States. The minimum service obligation is 2 years and is to be performed as a commissioned or civilian member of the NHSC or, under specified conditions, in a private clinical practice.

## Major Points of the Report

1. Appropriations for the 1979-80 academic year (fiscal year 1979) were $75 million, a $15 million increase over the previous year. Appropriations for the seven award cycles from the 1973-74 academic year (fiscal year 1974) total $245.5 million.
2. Applications for new awards for the 1979-80 academic year totaled 7,399. Applications for the seven annual award cycles of the Programs total 26,931.
3. Awards for the 1979-80 academic year totaled 6,408, with 2,379 awards made to new recipients and 4,029 to former recipients. For the seven award cycles of the Program, 22,670 awards have been made to 11,446 students.
4. By the end of fiscal year 1979, 238 Scholarship recipients had fulfilled their service obligation; 189 were physicians and 49 were dentists. During the 1979 fiscal year, 605 Scholarship participants entered obligated service of 2 to 4 years. Eight thousand nine hundred and ten Scholarship participants are still in training. They are expected to enter service obligations during the fiscal years 1980 through 1986. The service obligation of all recipients since the Program began totals over 22,000 person-years.

# INTRODUCTION

This is the Third Annual Report to the Congress on the National Health Service Corps Scholarship Program.

Section 751(i) of the Public Health Service (PHS) Act, as amended, requires the Secretary of Health, Education, and Welfare to report to Congress on March 1 of each year:

- the number and type of health professions students receiving support under the Scholarship Program;
- the educational institutions at which Scholarship students are receiving their training;
- the number of applications filed in the reporting year and in prior school years; and,
- the amount of tuition paid in the aggregate and at each educational institution for the reporting year and for prior school years.

Tables 1 through 5 of the Appendix fulfill these reporting requirements, while Tables 6 through 9 provide additional information on the progress of the Scholarship Program since its inception.

The Scholarship Program was established by the Emergency Health Personnel Act Amendments of 1972 (P.L. 92-585) enacted on October 27, 1972, and extended through fiscal year 1977 (1977-78 academic year) by various public laws. This legislation was replaced in fiscal year 1978 (1978-79 academic year) by the Health Professions Educational Assistance Act of 1976 (P.L. 94-484) which extended the authority for the National Health Service Corps and revised the Scholarship Program through fiscal year 1980 (1980-81 academic year). As amended by these public laws, Sections 331-38 of the Public Health Service Act contain authority for the NHSC, and sections 751-56 contain authority for the Scholarship Program.

The Scholarship Program is administered by the Division of Manpower Training Support of the Bureau of Health Manpower, Health Resources Administration (HRA). The NHSC is administered by the Bureau of Community Health Service of the Health Services Administration (HSA). The HRA and HSA are two of the six agencies of the Public Health Service, U.S. Department of Health, Education, and Welfare.

## Appropriations

The 1979 fiscal year appropriation for Scholarship awards was $75 million, a 25 percent increase over the previous year. The total congressional appropriation for the Scholarship Program from the 1973-74 through the 1979-80 academic year was $245.5 million, as summarized in Table A, of which $97.8 million was obligated for tuitions and fees and $146 million for stipends and other reasonable educational expense payments. Of the total appropriation, about 78.7 percent ($191.9 million) was obligated for awards to students of allopathic medicine; 11.6 percent ($28.4 million) to students of osteopathic medicine; 6.2 percent ($15.1 million) to students of dentistry; 1.4 percent ($3.3 million) to students of nursing at the baccalaureate level; and, 2.1 percent ($5.1 million) to students of other health disciplines.

**TABLE A — NHSC scholarship appropriations fiscal years 1974 through 1979**

| | |
|---|---|
| 1974 | $ 3,000,000 |
| 1975 | 22,500,000 |
| 1976 | 22,500,000 |
| Transition Quarter | 22,500,000 |
| 1977 | 40,000,000 |
| 1978 | 60,000,000 |
| 1979 | 75,000,000 |
| TOTAL | $245,500,000 |

Table 4 of the Appendix displays the funds obligated for tuition and fees by discipline and academic year. Table 5 gives the distribution of funds by State, discipline, educational institution, and academic year.

# SCHOLARSHIP APPLICATIONS

## Health Disciplines

The NHSC Scholarship Program was established "... to assure an adequate supply of trained physicians, dentists, and nurses for the National Health Service Corps and, if needed by the Corps, podiatrists, optometrists, pharmacists, graduates of programs in health administration, graduates of programs for the training of physicians assistants, expanded function dental auxiliaries, nurse practitioners (as defined in the PHS Act), and other health professionals."

The authority for the Scholarship Program requires that 90 percent of the funds appropriated shall be obligated for scholarships to students of allopathic and osteopathic medicine and to students of dentistry. Ten percent of the 90 percent is to be obligated for scholarships to dental students. This leaves up to 10 percent of the funds remaining to be used for awards to students in other health disciplines needed by the NHSC.

The determination of the number of students and types of other health disciplines to participate in new awards is made annually, based upon the current and projected needs of the NHSC. For the 1979-80 application cycle, the Scholarship Program accepted applications from students of baccalaureate degree programs in nursing, master's degree programs of nurse practitioner education, community health nursing, nurse midwifery, and public health nutrition, and from students of podiatric medicine, pharmacy, optometry, and veterinary medicine (Table B). Because the number of awards available to students was limited, competition for pharmacy and optometry awards was restricted to students who participated in the Scholarship Program for First-Year Students of Exceptional Financial Need.

## Eligibility

To be eligible to participate in the NHSC Scholarship Program for the 1979-80 academic year, an applicant had to be:

1. A citizen of the United States,
2. Enrolled, or accepted for enrollment, as a full-time student in:
    a. an accredited educational institution in a State (as defined in section 2(f) of the PHS Act),
    b. a course of study authorized for participants in the scholarship program, and
3. Eligible to begin the service obligation immediately upon completion of academic or postgraduate training.

Citizens of the United States attending foreign schools were not eligible to receive awards.

## Selection Criteria

The following criteria for selecting initial awardees were designed* to identify applicants with personal qualifications and clinical career goals which most nearly matched those needed by the NHSC. Applicants competed for awards with others in their own discipline and class year. No scholarship awards were made by State or school quotas, nor were student financial needs, school tuition rates, age, sex, race, or marital status considered in making selections.

The criteria which determined an applicant's ranking were:

1. Career Goals — the applicant's expressed intent to enter into a primary care practice in an urban or rural health manpower shortage setting following the period of obligated service.

2. Work Experience — the extent to which an applicant's work background had included salaried or volunteer experience in medically underserved urban or rural settings.

3. Community Background — the extent to which an applicant had personal experience in medically underserved urban or rural settings.

4. Academic Performance — for applicants of selected disciplines, based on transcripts and other documentation.

As required by statute, priority for awards was given each year to participants who had previously received NHSC Scholarships and to applicants who participated in the Scholarship Program for First-Year Students of Exceptional Financial Need during the 1978-79 school year.

## Application

Table 6 of the Appendix details the number of applications (7,399) for the 1979-80 academic year by discipline and year of graduation. Table 7 shows the number of applications by State, discipline, educational institution, and year of graduation.

Table 3 of the Appendix provides a summary of the number of applications received for new (initial) awards during the seven award cycles of the Scholarship Program. Of 26,931 applications, 16,874 were from students of allopathic medicine; 2,458 from students of osteopathic medicine; 4,271 from students of dentistry; 971 from students of nursing at the baccalaureate level; and, the remaining from students in other health disciplines.

## Awards

Since the beginning of the Scholarship Program, 22,670 new and continuation awards have been made to 11,446 students (Table B). Awards were made to 8,822 students of allopathic medicine, 1,156 students of osteopathic medicine, 769 dental students, 279 baccalaureate nursing students, and 420 to students of other disciplines. For the 1979 fiscal year, 6,408 awards were made, with 2,379 awards made to new receipients, and 4,029 to former recipients.

For the 1979-80 academic year, each Scholarship award consisted of the following benefits:

1. Payment to the school of the full amount of tuition and required fees that would otherwise be billed to the student.

2. A monthly stipend for living expenses of $453 for a total of $5,436. The stipend for the 1979-80 academic year reflected a 5.5 percent cost-of-living increase over the $429 monthly stipend paid during the 1978-79 academic year.

3. An additional amount paid directly to the student to cover all other reasonable educational expenses, such as books, equipment, and supplies. The amount of this payment was determined by each school and was based upon the average for all students in that school in the same curriculum and class year.

The average amount obligated on behalf of the 6,408 students receiving new and continuation awards for the 1979-80 academic year was $11,704.

Public Law 95-600, enacted November 6, 1978, provided that Scholarship Program benefits paid to, or on behalf of, participants receiving new awards through the 1979-80 academic year were not subject to Federal taxation for benefits received through

December 31, 1983. As of the date of this Report, the tax exemption does not apply to students entering the Scholarship Program for the first time in the 1980-81 academic year or later.

As Table B indicates, only students of allopathic and osteopathic medicine were supported during the first two award cycles: 1973-74 and 1974-75. Support was extended in 1975-76 to dental students, and in 1977-78, to baccalaureate nursing students and to master's degree students of nurse midwifery, nurse practitioner education, public health nursing, public health nutrition, medical social work, and speech pathology-audiology programs. Support was first made available to students of optometry, pharmacy, podiatry, and veterinary medicine in the 1979-80 school year.

Table C lists the 10 schools of medicine and osteopathy with the greatest number of Scholarship award recipients since the Program began in the 1973-74 school year.

Table D compares the number of applications received, by discipline, to the number of awards available for the 1979-80 academic year.

**Deferments**

Scholarship Program participants in allopathic and osteopathic medicine (physicians) are required to complete an internship or equivalent training before beginning their

| Pharmacy | 16 | 6 | 2.7 |

*This figure does not include 831 applications received from ineligible students.

obligated service. All physicians, therefore, receive deferments for at least 1 year of postgraduate training. Dentists may begin their service upon graduating from dental school.

Both physicians and dentists receive deferments upon their request for periods not exceeding 3 years to complete clinical specialty (residency) training. Deferrals of service may be authorized for periods exceeding 3 years, providing that the training pursued is consistent with needs of the National Health Service Corps.

Optometry, pharmacy, podiatry, and veterinary medicine Scholarship Program participants may begin their obligated service upon completion of academic training. However, they will receive deferments upon their request for periods not exceeding 1 year to complete internship, residency, or other advanced clinical training. Deferrals exceeding 1 year may be authorized, providing that the training pursued is consistent with the needs of the National Health Service Corps.

No statutory provision has been made to delay the service obligation for Scholarship participants in other disciplines.

A total of 2,407 physicians and 7 dentists were pursuing 1 or more years of postgraduate training as of September 30, 1979. Among these physician deferees, 145 were in internships, 1,835 were completing primary care training (family practice, internal medicine, or pediatrics), 181 were in obstetrics-gynecology residencies, 130 were completing psychiatry residencies, and 116 were in other specialty training. The 7 dental deferees were in 1-year, general practice residencies. The first group of optometry, pharmacy, podiatric, and veterinary medicine participants will graduate from school and be eligible for deferments in the spring of 1981.

# SERVICE OBLIGATIONS AND DEFAULTS

**Service Obligation**

For each year of support, Scholarship recipients must agree to serve 1 year providing clinical services in designated health manpower shortage areas of the United States. The minimum service obligation is 2 years and is to be perfomed as a commissioned or civilian member of the NHSC or, under specified conditions, in a private clinical practice

Under the private practice provision of the law, Scholarship recipients may be released from part or all of their service obligation if they agree to engage in full-time private clinical practice in designated health manpower shortage areas. The areas must have a priority for assignment of NHSC personnel and a sufficient financial base to sustain a practice.

Due to the nature of medical and medically-related training, the Scholarship Program is a long-term effort. A student who has received 4 years of support to complete medical school and a deferral of 3 years for residency training does not become available for professional service until 7 years after the first award was made. Therefore, although the Scholarship Program began in the 1973-74 academic year, only 189 physicians and 49 dentists had completed their service obligation by September 30, 1979. The number of years of obligated service due from all Scholarship recipients in the Program to date totals over 22,000 person-years of health care service.

Scholarship recipients first entered periods of obligated service in 1976 with 47 physicians and 28 dentists activitated to PHS duty. The number entering service rose to 206 in 1977, 409 in 1978, 605 in 1979, and is expected to reach 1,028 in 1980. The number of health practitioners provided by the Scholarship Program is expected to peak in the late 1980's.

Scholarship recipients constituted about 38 percent (697) of the field strength of the NHSC as of September 30, 1979. The remaining 62 percent (1,132) consisted of volunteers. An additional 400 Scholarship recipients were serving in the Bureau of Medical Services and in the Indian Health Service, components of the Health Services Administration. A greater proportion of the NHSC field strength is expected to come from the Scholarship Program in future years.

Before a community can request the services of NHSC practitioners, it must be designated a health manpower shortage area. New criteria for more precise designation of health manpower shortage areas were mandated by P.L. 94-484 and published in the *Federal Register* of January 10, 1978, as Interim-Final Regulations. The concept was expanded to cover not only geographic areas but also population groups and many types of public facilities. The key ratio criterion was changed so that an area with 3,500 or more residents per primary care physician may be designated as having a shortage. Areas with even fewer residents per primary care physician may be designated if other indicators of need are significant, such as infant death rates, health status of population, or access to health services.

## Default

"Default" is the term used to describe the status of Scholarship recipients who for any reason fail to begin or complete their service obligation. The current provisions in the NHSC Scholarship Program governing default differ from those in the earlier PH/NHSC Scholarship Training Program:

*PH/NHSC SCHOLARSHIP PROVISIONS*

1. Individuals who were academically dismissed or who voluntarily terminated training before graduation had to repay the Federal Government all the funds paid to them or on their behalf. No interest was charged and payment was due within 3 years from the date of default.

2. Participants who completed training but failed to begin or complete their service obligation were liable to repay all funds paid to them or on their behalf, plus interest at the maximum legal prevailing rate (currently 8 percent) within 3 years of the date of default.

*NHSC SCHOLARSHIP PROVISIONS*

1. Participants who fail to complete their academic training are required to repay all indebtedness within 3 years. No interest is charged on this indebtedness.

2. Those who have completed training but fail to begin or complete their service obligation are liable for repayment of 3 times the sum of (a) the amount of all scholarship funds paid to them and to the school on their behalf, and (b) the interest (currently 14%). This amount must be paid within 1 year of the date of default.

Under both programs, a waiver or suspension may be granted in cases where fulfillment of the service or financial obligation would be impossible, or would involve extreme hardship, and if enforcement would be unconscionable.

From May 1973 through September 1979, academic failure, disciplinary dismissal, and voluntary withdrawal accounted for 97 recipients in default. For the same period, of the remaining 4,517 recipients who completed their academic training, 666 failed to begin or complete their service obligation.

Of the 666 recipients who have defaulted, 61 have paid back monetarily the full amount of the indebtedness they incurred. The Scholarship Program has granted 40 waivers to recipients who have defaulted on their Scholarship service obligation due to death, physical or mental disability, or severe financial problems. The remaining recipients who have defaulted are in varing stages of either paying back their obligation or arranging a repayment schedule with the Program.
